

BUSINESS PROPOSAL FOR CHURCH GRANT SUPPORT

KiaKia Foods

Date: 13 July 2026

Submitted To: CYON, Holy Family Catholic Church, Life Camp, Abuja

Prepared by: KiaKia Foods Management Team

Location: Abuja, Nigeria

Recipient Context (Research Snapshot)

This proposal is specifically prepared for CYON at Holy Family Catholic Church, Life Camp, Abuja. Public information indicates the parish has an active youth body (CYON), a parish website presence, and regular community programs. The requested support is designed to align with youth empowerment, service outreach, and accountable stewardship.

1. Executive Summary

KiaKia Foods is a growing grocery sourcing and last-mile delivery business serving households and professionals in Abuja. Our model helps families save time, avoid market stress, and receive affordable groceries at their doorstep. We are applying for a church grant to strengthen our operations, serve more families, and create dignified jobs for young people in our community.

2. Problem Statement

Many households in our service area face three recurring challenges: (1) limited time to shop physically, (2) unstable access to fresh and reliable market goods, and (3) expensive, uncoordinated delivery options. These challenges affect working families, elderly people, and single parents most.

3. Our Solution

KiaKia Foods aggregates customer orders, assigns trained runners for market sourcing, and coordinates grouped estate deliveries. This method lowers delivery cost per household, improves service reliability, and supports transparent order tracking.

4. Mission Alignment with CYON and Parish Community Impact

This proposal aligns with CYON and parish values of service, stewardship, and youth formation through practical economic opportunity. The business creates impact through household food access, fair work opportunities, and skill development pathways for young adults in the church community. Our service also supports vulnerable members through planned and assisted grocery access.

5. Target Beneficiaries

Primary beneficiaries include working families, church members, elderly households, and low-mobility customers in Abuja estates. Secondary beneficiaries include runners, dispatch riders, and support staff employed through expanded operations.

6. Operational Plan (12-Month)

Phase 1 (Months 1-3): Increase sourcing capacity, standardize operations, and onboard additional runners and dispatch riders.

Phase 2 (Months 4-8): Expand to additional estates and improve service reliability through route batching.

Phase 3 (Months 9-12): Consolidate quality controls, retention programs, and financial reporting.

7. Grant Request and Use of Funds

Requested Church Grant: **N2,000,000**

Budget Item	Amount (NGN)	Purpose
Working Capital for Bulk Sourcing	N700,000	Stabilize product availability and pricing
Logistics and Delivery Expansion	N450,000	Rider support, fuel, route execution, service consistency
Operations Technology and Tools	N250,000	Order management improvements and reporting tools
Staff Recruitment and Training	N250,000	Onboard and train runners/operations assistants
Customer Growth and Outreach	N200,000	Community awareness and service adoption
Contingency and Risk Buffer	N150,000	Manage volatility and emergency needs
Total	N2,000,000	

8. Financial Outlook (Year 1)

Metric	Projected Amount (NGN)
Projected Annual Revenue	N42,000,000
Projected Direct Operating Costs	N28,500,000
Projected Gross Margin	N13,500,000
Projected Net Surplus (after overhead)	N6,800,000

9. Key Performance Indicators

We will track measurable outcomes monthly:

- Number of active households served
- On-time delivery rate
- Cost-per-delivery and delivery margin
- Runner productivity and retention
- Number of jobs sustained/created
- Number of vulnerable households supported

10. Governance, Accountability, and Reporting

KiaKia Foods commits to transparent stewardship of grant funds. We will submit periodic reports to the church covering fund utilization, impact metrics, business performance, and lessons learned. We welcome oversight and advisory support from church leadership.

11. Risk Management

Main risks include market price volatility, logistics delays, and demand fluctuations. Mitigation actions include bulk purchase planning, estate-based batching, reserve buffers, and ongoing process controls through our order management system.

12. Closing Statement

With church grant support, KiaKia Foods will scale responsibly, deepen community service, and strengthen household food access while creating meaningful livelihoods. We respectfully request your partnership to make this expansion possible.
